

Dear asylum-seeker,

our medical care is a **voluntary** service. This means that doctors do not receive any payment.

Doctors and assistants examine and consult with you on a voluntary basis, offering to help with your health problems.

We also want to support you to better find your way through the German health care system. For example, we will be glad to refer you to specialized doctors for further consultation and medication.

Here, medicine can be prescribed only in emergencies and in small quantities as it needs completely to be financed by private donations.

Thank you for your understanding
